List handling

A bulleted list with a nested level:

- First item
- Second item
  - Nested one
  - Nested two
- Third item

An ordered list that starts at one:

1. Prepare the input
2. Run the converter
3. Review the output

This filler paragraph checks that long paragraphs are rebuilt as a single line, with no arbitrary breaks and no duplicated spaces between words, across several lines of justified or ragged text in a single-column layout.
